Triple Point, the award-winning game at Ontario's Level Up Student Showcase 2023, captivates players with its imaginative concept and exceptional design. As the first-place winner for "Overall Best Game" and third place for "Best Artistic Achievement," Triple Point stands out as a single-player linear adventure puzzle game.

In this visually stunning experience, players embody a sentient water creature with the ability to seamlessly transition between liquid, solid, and gas states. Each state unlocks unique qualities and perks crucial for navigating through an enigmatic environment across five levels featuring themed rooms and diverse mechanics.

The game supports both gamepad and keyboard/mouse controls, allowing players to hold specific buttons to transition between states and execute distinct main actions. The engaging gameplay encourages exploration and problem-solving, making Triple Point a standout entry in the world of indie games.
